

WAQAR AHMED

AGENTIC AI ENGINEER | LLM SYSTEMS & APPLIED NLP

Islamabad, Pakistan (UTC+5) | waqarahmed44870@gmail.com
buildsbywaqar.xyz | github.com/Waqar-ahmedkhan | LinkedIn: waqarahmeddev

AI engineer building model-assisted workflows, secure product integrations, and low-resource language research tooling. Combines tool calling, retrieval-augmented generation, context engineering, and human oversight with full-stack delivery. Research interests include language-model adaptation, evaluation, and reliable agent execution.

CORE EXPERTISE

Agents & LLMs: OpenAI API, LangChain, tool calling, RAG, context engineering, human approval workflows, LLM evaluation.

Applied NLP: Python, Hugging Face Transformers, Qwen3, QLoRA, instruction tuning, dataset auditing, Unicode-safe preprocessing.

Systems: TypeScript, Node.js, NestJS, REST APIs, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS, CI/CD, Prometheus, Grafana.

SELECTED RESEARCH & AI SYSTEMS

PashtoGPT | Low-resource language adaptation | Research repository

- Developed an open-source research toolkit for Pashto: source auditing, Unicode-safe data preparation, Qwen3-1.7B QLoRA experiments, and Kaggle training workflows.
- Prepared held-out evaluation with Belebele and native-speaker review, alongside retrieval and verifier diagnostics. Research stage; trained weights and measured quality gains are not yet released.

EduAI | Personalized learning | Project repository

- Built course creation, adaptive quizzes, role-based access, summarization, and question-answering workflows; developed learner-progress-based content recommendations.

PROFESSIONAL EXPERIENCE

Geekinate | Senior AI Engineer - Agentic AI & FDE | Aug 2025 - Present

- Contributed to agentic HR automation spanning recruitment and employee operations, integrating AI-assisted workflows with human approval checkpoints.
- Delivered web and mobile product workflows across Space Manager, Lilia, Shifa Foundation USA, and Twinhub; connected reusable interfaces with backend APIs and admin operations.

Viral Mobitech | Full Stack AI Engineer (project-based) | Dec 2024 - Dec 2025

- Improved Bondvia matching reliability, database indexing, API performance, and call-session handling for random video calling at 10K daily users.
- Built authentication, OTP, and onboarding APIs for Next-Chat; strengthened Meetany security and supported deployment, CI/CD, and monitoring.

National Incubation Center, Kohat | AI Engineer / Technical Mentor | Jan 2023 - Dec 2024

- Translated founder requirements into MVP user flows, data models, API contracts, and deployed React/Next.js, Node.js, and PostgreSQL products.

EDUCATION & RECOGNITION

BS Computer Science | Kohat University of Science and Technology | 2020 - 2024 | CGPA: 3.5/4.0

Selected credentials: Machine Learning (Stanford / DeepLearning.AI); Deep Learning and MLOps (DeepLearning.AI); AWS Technology Consultant Professional Certificate.

Recognition: EduAI Best Project Poster Award, KUST (2025). Mentored 100+ students and developers.
