

WAQAR AHMED

FULL STACK AI ENGINEER | AI PRODUCTS & PLATFORM DELIVERY

Islamabad, Pakistan (UTC+5) | waqarahmed44870@gmail.com
buildsbywaqar.xyz | github.com/Waqar-ahmedkhan | LinkedIn: waqarahmeddev

Full stack AI engineer delivering AI-powered products from customer requirements through interfaces, APIs, databases, and deployment. Experience spans agentic HR workflows, learning platforms, coworking SaaS, and real-time communication. Connects product needs with secure system design, operational reliability, and applied language-model research.

TECHNICAL EXPERTISE

AI engineering: OpenAI API, LangChain, RAG, tool calling, context engineering, Hugging Face, Python, QLoRA, LLM evaluation.

Product development: TypeScript, JavaScript, React, Next.js, React Native, Tailwind CSS, Node.js, NestJS, Express, REST APIs.

Data & security: PostgreSQL, MongoDB, Redis, Prisma, Firebase, indexing, JWT/OAuth, RBAC, OTP authentication.

Delivery & real time: AWS, Docker, Kubernetes, GitHub/GitLab CI/CD, ArgoCD, Helm, Prometheus, Grafana, WebRTC, WebSockets.

PROFESSIONAL EXPERIENCE

Geekinate | Senior AI Engineer - Agentic AI & FDE | Aug 2025 - Present

- Built Space Manager serverless SaaS workflows for spaces, bookings, customers, dashboards, reports, and administration.
- Delivered React/Next.js and React Native features for Lilia and client products, connecting reusable UI, backend integrations, and API-driven workflows; contributed to HR automation with approval checkpoints.

Viral Mobitech | Full Stack AI Engineer (project-based) | Dec 2024 - Dec 2025

- Improved Bondvia matching reliability, database indexing, API performance, and call-session handling for random video calling at 10K daily users.
- Built authentication, OTP, and onboarding APIs for Next-Chat; strengthened Meetany security and supported deployment, CI/CD, and monitoring.

National Incubation Center, Kohat | AI Engineer / Technical Mentor | Jan 2023 - Dec 2024

- Translated founder requirements into MVP user flows, data models, API contracts, and deployed React/Next.js, Node.js, and PostgreSQL products.

SELECTED AI PROJECTS

EduAI | AI-powered learning platform | Project repository

- Built adaptive quizzes, course creation, role-based access, summarization, and Q&A; developed a recommendation model using learner progress and course relevance.

PashtoGPT | Low-resource language adaptation | Research repository

- Developed an open-source research toolkit for Pashto: source auditing, Unicode-safe data preparation, Qwen3-1.7B QLoRA experiments, and Kaggle training workflows.
- Prepared held-out evaluation with Belebele and native-speaker review, alongside retrieval and verifier diagnostics. Research stage; trained weights and measured quality gains are not yet released.

EDUCATION & RECOGNITION

BS Computer Science | Kohat University of Science and Technology | 2020 - 2024 | CGPA: 3.5/4.0

Selected credentials: Machine Learning (Stanford / DeepLearning.AI); Deep Learning and MLOps (DeepLearning.AI); AWS Technology Consultant Professional Certificate.

Recognition: EduAI Best Project Poster Award, KUST (2025). Mentored 100+ students and developers.
